### IBKRWEBINARS.COM

### **Disclosure:**

Options involve risk and are not suitable for all investors. For information on the uses and risks of options, you can obtain a copy of the Options Clearing Corporation risk disclosure document titled <a href="Characteristics and Risks of Standardized Options">Characteristics and Risks of Standardized Options</a> by calling (312) 542-6901.

Futures are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading futures, please read the <a href="CFTC Risk Disclosure">CFTC Risk Disclosure</a>. For a copy visit interactive brokers, com.

Security futures involve a high degree of risk and are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading security futures, please read the <u>Security Futures Risk Disclosure Statement</u>. For a copy visit Interactivebrokers.com.

There is a substantial risk of loss in foreign exchange trading. The settlement date of foreign exchange trades can vary due to time zone differences and bank holidays. When trading across foreign exchange markets, this may necessitate borrowing funds to settle foreign exchange trades. The interest rate on borrowed funds must be considered when computing the cost of trades across multiple markets.

The Order types available through Interactive Brokers LLC's Trader Workstation are designed to help you limit your loss and/or lock in a profit. Market conditions and other factors may affect execution. In general, orders guarantee a fill or guarantee a price, but not both. In extreme market conditions, an order may either be executed at a different price than anticipated or may not be filled in the marketplace.

There is a substantial risk of loss in trading futures and options. Past performance is not indicative of future results.

Any stock, options or futures symbols displayed are for illustrative purposes only and are not intended to portray recommendations.

# Social Market Analytics

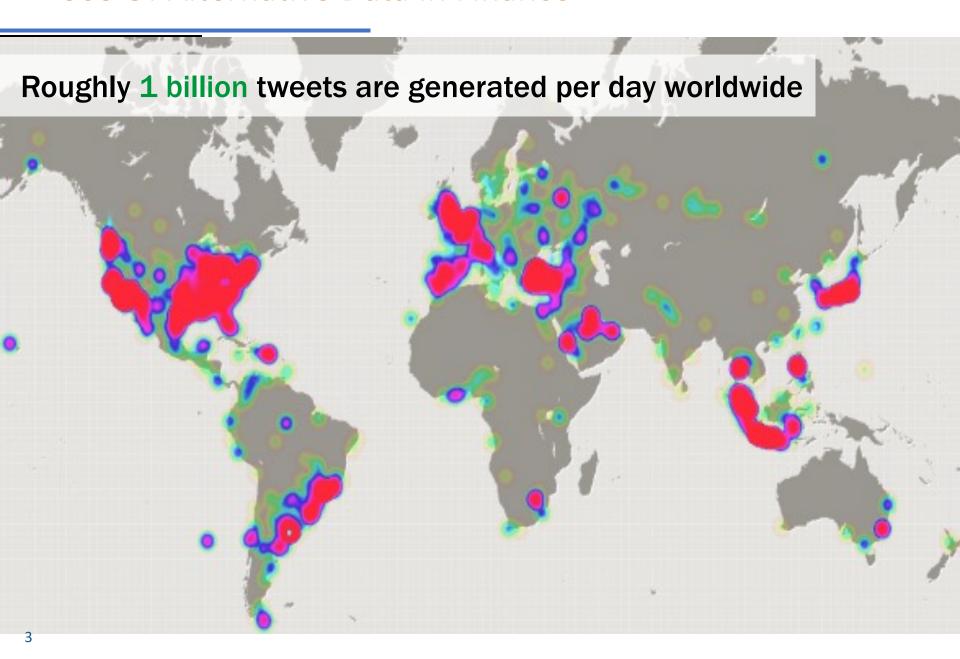

An Uncorrelated Source of Predictive Data

# Agenda

- Use of Alternative Data In Finance
- Social Market Analytics (SMA) Social Media Framework
- What Social Media Can Offer Every Investor
- How to use SMA Data on the IBKR platform

# Use Of Alternative Data In Finance

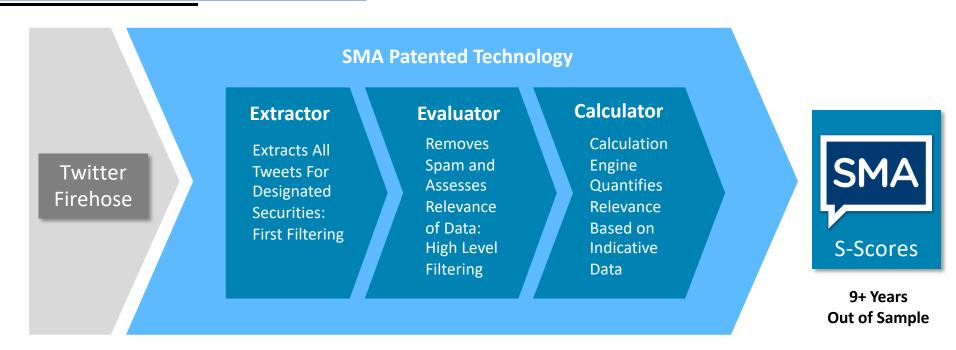

SMA harnesses these Twitter signals to deliver real-time social sentiment to hedge funds, asset managers, market makers, and risk managers

### SMA Patented Social Media Framework

### SMA has three U.S. Patents behind our Process:

- Aggregates the intentions of professional investors as expressed on Twitter and StockTwits as well as other inputs such as earnings call reports, 10-K, and 10-Qs
- Calculate sentiment metrics characterizing the current conversation relative to historical benchmarks

# **SMA Intellectual Property**

### **Out of Sample History**

- > SMA has 8 years of out-of-sample data
- Twitter ability to delete accounts and Tweets can lead to survivorship bias in other datasets. SMA has full Twitter history
- Account and dictionary changes are applied on a point in time go-forward basis

### **Complex Topic Modelling**

SMA's Machine Learning Topic Modeling drills down at the Security or Topic level identifying only relevant Topics or Tweets. SMA Topic Modeling covers both Listed and Private Companies and any Macro Topic

### **Independent Research**

- > External and Internal Research\*
- IHS Markit, Deutsche Bank, ITG,
   MIT, Rutgers, CBOE, Illinois
   \*partial list

- SMA Proprietary machine learning phrase and word financial dictionary built over 8 years
- > Scores calculated in real-time 24X7
- > Fine grain scoring -1.000 to +1.000 at the Textual or Tweet level
- Multi pass approach used in evaluation of each Tweet increases

scoring accuracy

- > Proprietary 12-step algorithm rates every Twitter Account and identifies professional investors
- Account accuracy metrics at the Security level

### **SMA Parsing Engine**

 SMA built Processor to format any textual or tabular data (txt, html, pdf, etc.) into Machine Readable text into a JSON API output

SMA Proprietary & Confidential

### SMA Social Media Framework

Since 2011, Social Market Analytics, Inc. has developed a proprietary financial dictionary that fine grain scores each Tweet from -1.0000 to +1.0000

SMA captures whether the tone of the conversation is positive or negative which is then baselined against historical data to create S-Scores

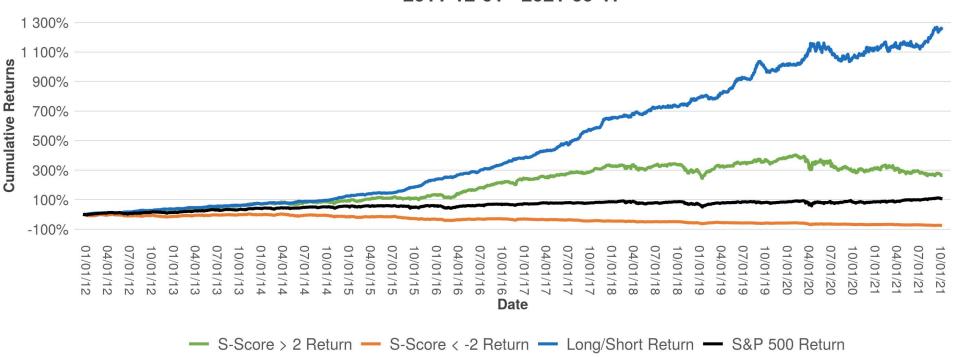

# What Social Media Can Offer Every Investor

- Social Media is a leading indicator of security performance
  - Securities being discussed more positively on Twitter tend to outperform
  - Securities discussed more negatively on Twitter tend to underperform (illustration Next Slide)
- New Trade Ideas
- Position Monitoring
- Trade Execution (i.e. Buy/Sell or TWAP/VWAP)

# Full History – Long/Short

|S-Score| > 2 and Price > 5 Long and Long Short Portfolio O-C Returns Twitter Derived 09:10 AM Sentiment 2011-12-01 - 2021-09-17

Portfolio	Cum. Ret	Sharpe	Sortino
S-Score > 2	266.38%	0.98	1.59
S-Score < -2	-74.63%	-0.80	-1.24
Long / Short	1264.51%	3.24	6.17

- Social Sentiment Score is the normalized exponentially time weighted summation of sentiment of unique Tweets received from credible accounts in a rolling 24-hour window at the time of observation. Tweets arriving closer to the observation time have a higher weight.
- Social Sentiment Score Delta is the change in sentiment over the last 15 minutes.
- Social Sentiment Score Change is the change in sentiment from the prior day average.
- Tweet Volume Score is the normalized value of Indicative Tweet volume used to compute the social sentiment score, which is the number of unique Tweets arriving in a 24-hour interval from credible accounts.
- Tweet Volume Score Change is the change in Tweet Volume Score over the last day.

# Most Positive Sentiment Change

Largest Social Sentiment Score change is a list of securities with the largest positive sentiment change.

PLRX has a Social Sentiment of 4.24 with a change of +8.48. That means sentiment went from extremely negative to extremely positive. That is a bullish signal
