Disclosure:

Options involve risk and are not suitable for all investors. For information on the uses and risks of options, you can obtain a copy of the Options Clearing Corporation risk disclosure document titled Characteristics and Risks of Standardized Options by visiting ibkr.com/occ. Multiple leg strategies, including spreads, will incur multiple transaction costs.

Futures are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading futures, please read the [CFTC Risk Disclosure](#). For a copy visit your local Interactive Brokers Website.

Security futures involve a high degree of risk and are not suitable for all investors. The amount you may lose may be greater than your initial investment. Before trading security futures, please read the [Security Futures Risk Disclosure Statement](#). For a visit copy your local Interactive Brokers Website.

Any discussion or mention of an ETF is not to be construed as recommendation, promotion or solicitation. All investors should review and consider associated investment risks, charges and expenses of the investment company or fund prior to investing. Before acting on this material, you should consider whether it is suitable for your particular circumstances and, as necessary, seek professional advice.

There is a substantial risk of loss in foreign exchange trading. The settlement date of foreign exchange trades can vary due to time zone differences and bank holidays. When trading across foreign exchange markets, this may necessitate borrowing funds to settle foreign exchange trades. The interest rate on borrowed funds must be considered when computing the cost of trades across multiple markets.

The Order types available through Interactive Brokers Trader Workstation are designed to help you limit your loss and/or lock in a profit. Market conditions and other factors may affect execution. In general, orders guarantee a fill or guarantee a price, but not both. In extreme market conditions, an order may either be executed at a different price than anticipated or may not be filled in the marketplace.

There is a substantial risk of loss in trading futures and options. Past performance is not indicative of future results.

Any stock, options or futures symbols displayed are for illustrative purposes only and are not intended to portray recommendations.

IRS Circular 230 Notice: These statements are provided for information purposes only, are not intended to constitute tax advice which may be relied upon to avoid penalties under any federal, state, local or other tax statutes or regulations, and do not resolve any tax issues in your favor.

Interactive Brokers LLC is a member of NYSE FINRA SIPC

As with all investments, your capital is at risk

DISCLAIMER

Any statement that necessarily depends on future events may be a forward-looking statement. Forward-looking statements are not guarantees of performance. They involve risks, uncertainties and assumptions. Although such statements are based on assumptions that are believed to be reasonable, there can be no assurance that actual results will not differ materially from expectations. Investors are cautioned not to rely unduly on any forward-looking statements. In connection with any forward-looking statements, investors should carefully consider the areas of risk described in the most recent simplified prospectus.

Distributions are not guaranteed and may fluctuate. Distribution rates may change without notice (up or down) depending on market conditions. The payment of distributions should not be confused with an investment fund's performance, rate of return or yield. If distributions paid by an investment fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by an investment fund, and income and dividends earned by an investment fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base goes below zero, you will have to pay capital gains tax on the amount below zero. Please refer to the distribution policy for BMO ETF set out in the prospectus.

Cash distributions, if any, on units of a BMO ETF (other than accumulating units or units subject to a distribution reinvestment plan) are expected to be paid primarily out of dividends or distributions, and other income or gains, received by the BMO ETF less the expenses of the BMO ETF, but may also consist of non-taxable amounts including returns of capital, which may be paid in the manager's sole discretion. To the extent that the expenses of a BMO ETF exceed the income generated by such BMO ETF in any given month, quarter or year, as the case may be, it is not expected that a monthly, quarterly, or annual distribution will be paid.

S&P®, S&P/TSX Capped Composite®, S&P 500® are registered trademarks of Standard & Poor's Financial Services LLC ("S&P") and "TSX" is a trademark of TSX Inc. These trademarks have been licensed for use by S&P Dow Jones Indices LLC and sublicensed to BMO Asset Management Inc. in connection with ZCN. The ZCN is not sponsored, endorsed, sold or promoted by S&P Dow Jones LLC, S&P, TSX, or their respective affiliates and S&P Dow Jones Indices LLC, S&P, TSX and their affiliates make no representation regarding the advisability of trading or investing in such BMO ETF(s).

The BMO ETFs or securities referred to herein are not sponsored, endorsed or promoted by MSCI Inc. ("MSCI"), and MSCI bears no liability with respect to any such BMO ETFs or securities or any index on which such BMO ETFs or securities are based. The prospectus of the BMO ETFs contains a more detailed description of the limited relationship MSCI has with BMO Asset Management Inc. and any related BMO ETFs.

Commissions, management fees and expenses all may be associated with investments in exchange traded funds. Please read the ETF Facts or prospectus of the BMO ETFs before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Exchange traded funds are not guaranteed, their values change frequently, and past performance may not be repeated.

For a summary of the risks of an investment in the BMO ETFs, please see the specific risks set out in the BMO ETF's prospectus. BMO ETFs trade like stocks, fluctuate in market value and may trade at a discount to their net asset value, which may increase the risk of loss. Distributions are not guaranteed and are subject to change and/or elimination.

This communication is for information purposes. The information contained herein is not, and should not be construed as, investment, tax or legal advice to any party. Particular investments and/or trading strategies should be evaluated relative to the individual's investment objectives and professional advice should be obtained with respect to any circumstance.

BMO Global Asset Management is a brand name that comprises BMO Asset Management Inc. and BMO Investments Inc.

BMO ETFs are managed by BMO Asset Management Inc., which is an investment fund manager and a portfolio manager, and a separate legal entity from Bank of Montreal.

Dividend Re-Investment Plan (DRIP)

A DRIP automatically reinvests cash dividends earned from eligible securities to purchase additional shares, commission-free

- Allows shareholders to reap the benefits of compounding and gradually grow their position over time.
- Provide an option to purchase fractional shares
- Particularly suitable for long term investments
- Cost efficient

Dollar Cost Averaging

Take some uncertainty out of the markets with Dollar Cost Averaging

- It is impossible to time the market, instead consider using dollar cost averaging (DCA) to build your investments.
- With DCA, you buy more units of mutual funds when prices are low and fewer when prices are high.
- Over time, this can reduce your average cost per unit, allowing you to take advantage of market dips and avoid investing large sums all at once.

Benefits Of DCA

- Helps avoid timing the market
- Keeps you focused on your long-term goals
- Removes stress and emotions from investment decisions
